

Tran Huu Nhan

Computer Networks and Data Communications

Date of birth: 28 August 2005 | Gender: Male

Email: nhanhuutran009@gmail.com | Phone: 0869918250

Portfolio: nhanhuutran007.github.io | GitHub: github.com/nhanhuutran007

Address: 19 Nguyen Huu Tho, Tan Hung, Ho Chi Minh City

Career Objective

I am seeking an IT Network Intern position where I can apply my knowledge in Computer Networks and Data Communications, together with the CCNA foundation I have developed at VnPro, in a practical working environment. My development direction focuses on system analysis, network troubleshooting, and technical infrastructure operations in enterprise environments.

After graduation, my goal is to grow in the IT Network/IT Infrastructure field and build the ability to connect operational needs with suitable technical solutions. I am eager to learn professional working processes, maintain a serious work attitude, and contribute practical value to the internship organization.

Education

Ton Duc Thang University

2023 – Present

Major: Computer Networks and Data Communications

- Cumulative GPA: 3.2/4.0, up to the end of the third year.
- Attendance score: 100/100.

Work Experience

IT Network Intern

2026 – Present

Chuyen Viet Consulting and Services Co., Ltd. (VnPro)

- Administered real network devices and supported stable operation of servers and Cisco ASA firewall systems.
- Studied technical documentation related to enterprise network systems, infrastructure deployment models, and network device operation procedures.
- Supported connectivity testing, basic troubleshooting, and technical assistance for internal departments.

Executive Committee Member, Faculty Youth Union of Information Technology

2023 – 2026
Ton Duc Thang University, Faculty of Information Technology

Sales Staff

2023 – 2024

Seven System Vietnam Joint Stock Company (7-Eleven)

- Consulted customers on company products and services.

Personal Projects

Netmiko-MCP: AI-Assisted Cisco Network Device Automation

- Built a solution for automating Cisco network device configuration and management using Python, Netmiko, and Model Context Protocol (MCP).
- Integrated an AI-assisted layer that allows network engineers to execute show commands, run ping tests, and apply configurations through natural language.

- Supported Cisco device access via SSH or Cisco CML sandbox, compatible with Windows, Linux, and macOS with Python 3.10 or later.

ESP32-BluFi Stack Overflow: Buffer Overflow Analysis on the BluFi Protocol

- Researched the NCC-BluFi-Ref-WXR vulnerability in Espressif Systems' BluFi protocol on ESP-IDF version 5.0.7 and earlier.
- Reproduced the attack scenario on real ESP32 hardware and analyzed the denial-of-service risk caused by memory overwrite and heap metadata corruption.
- Analyzed the root cause in C source code and proposed a mitigation approach by limiting copy length according to the safe size of the destination buffer.

UniDorm Website: Dormitory Student Management System

- Developed a web application to manage student information, room assignments, residency status, and related dormitory operations.
- Simplified residence data management, making student information lookup, updates, and tracking more convenient.
- Built the system using PHP, SCSS, CSS, and JavaScript.

Activities

Executive Committee Member

2023 – 2025

Faculty Youth Union of Information Technology – Ton Duc Thang University

- Participated in organizing community and student activities such as Mid-Autumn for Children, Spring Volunteer Campaign, and Youth Month.

Technical Team Leader

2025 – Present

ICON Club

- Organized IT-related academic activities for university students.

Certifications

- **2026:** CCNA: Enterprise Networking, Security, and Automation.
- **2024:** Career Essentials in Cybersecurity by Microsoft and LinkedIn.
- **2024:** Cybersecurity for Everyone.
- APTIS ESOL B2.

Technical Skills

Networking: TCP/IP, subnetting, VLAN, routing, switching, NAT, DHCP, DNS.

Network Devices: Cisco device configuration and administration; basic experience with Cisco ASA firewall.

Network Security: Foundational cybersecurity knowledge, access control, risk analysis, and basic security troubleshooting.

Systems: Basic server administration, system operation monitoring, and IT infrastructure troubleshooting support.

Tools: Cisco Packet Tracer, Git, Linux, LaTeX.

Web & Automation: Personal website development and exploration of automation tools for learning and operations.

Soft Skills

Teamwork: Collaborates effectively in group environments, especially through Youth Union, association, and club activities.

Communication & Consulting: Has customer consulting experience from working at 7-Eleven.

Organization & Management: Coordinates technical activities at ICON Club and supports IT event organization for students.

Analytical Thinking: Able to analyze problems logically, especially in network and system troubleshooting.

Language: APTIS ESOL B2 certification.

Interests

Automation tool deployment; learning about networking and network infrastructure; designing posters, standees, and social media posts; building websites in various domains; product photography.
